Summary

BBACA graduate with hands-on experience in data analytics, Python application development, AI/ML engineering, and full-stack software across 14+ published projects. Delivered end-to-end pipelines with statistical modelling (ARIMA, K-Means, t-test), interactive Power BI dashboards, and production-grade software (YOLOv8, Firebase, NLP). Skilled in Python, SQL, and JavaScript. Seeking entry-level roles in Pune.

Technical Skills

Languages: Python (Pandas, NumPy, scikit-learn, OpenCV, SciPy), SQL (PostgreSQL, SQLite), JavaScript, Java, C

Analytics & BI: Power BI (DAX, Power Query), Excel (Pivot Tables, Advanced Formulas), Tableau, Statistical Modelling (ARIMA, K-Means, t-test)

App Dev & Cloud: Firebase (Firestore, Auth), REST APIs, Tkinter GUI, SQLAlchemy, AWS (EC2, S3, RDS), Git/GitHub, PostgreSQL

Projects

Zepto vs Blinkit — Quick Commerce Intelligence War Room | Python · PostgreSQL · Power BI · Excel

Jul 2026

- Built an end-to-end data pipeline across 4 source datasets; applied t-test, chi-square, K-Means clustering, and 30-day ARIMA forecasting with fully validated, reproducible outputs.
- Delivered a 7-zone interactive Power BI dashboard (CEO summary, RFM segmentation, ARIMA revenue forecast) using DAX and Power Query — production-ready for executive stakeholder review.
- Identified and corrected 3 pipeline integrity bugs (cluster label inversion, narrative mismatch, statistical regeneration) using systematic root-cause analysis — mirroring production QA discipline.

Script2Cinema — Full-Stack Filmmaker Networking Platform | JavaScript · Firebase · Firestore · HTML/CSS

2025

- Engineered 11 interconnected application pages (feed, messaging, marketplace, onboarding, AI assistant) using vanilla JavaScript and Firebase Firestore with real-time streaming — zero external frameworks.
- Resolved Firestore listener conflicts, auth-state race conditions, and cross-page state sync bugs; maintained production-ready codebase with consistent design system across all modules.

Pan-India Cinema Intelligence Dashboard | Power BI · DAX · Python · Excel

2026

- Designed a multi-industry analytics dashboard covering Telugu, Hindi, and Marathi film industries; modelled box-office trends, genre-wise ROI, and audience segmentation using DAX and Power Query ETL.
- Translated raw industry data into executive-ready visual narratives with drill-through reports and cross-industry performance benchmarking slicers.

TITAN — Real-Time Multi-Object Detection App | Python · YOLOv8 · OpenCV · ByteTrack · Tkinter

2026

- Architected full software stack from YOLOv8 model inference to ByteTrack ID assignment and OpenCV rendering; achieved stable 30+ FPS on CPU-only environments with live Tkinter GUI.
- Debugged frame-drop and tracker ID collision issues; documented configuration, dependencies, and edge-case behaviours for reproducible deployment.

Internships & Experience

Artificial Intelligence Intern

2026

CodeAlpha

Remote

- Built TITAN (YOLOv8+ByteTrack), ARIA (TF-IDF retrieval + LLM API fallback chatbot), and a 20-language desktop translator — 3 functional software applications in one internship cycle.
- Debugged model inference latency, API timeout failures, and GUI threading conflicts; produced categorised bug logs with resolution notes.

Data Analytics Intern

2025

CodeAlpha

Remote

- Delivered end-to-end sentiment analysis on 50,000 IMDB reviews: scraping (BeautifulSoup), EDA, TextBlob NLP scoring, and Matplotlib/Seaborn visualisation in a reproducible Jupyter pipeline.

Data Analytics Consultant — Job Simulation

2025–2026

Forage / Tata iQ · Deloitte · AWS

Remote

- Performed EDA and predictive modelling for credit card delinquency reduction (Tata iQ); built interactive stakeholder dashboard and designed AWS cloud architecture — EC2, S3, RDS — with data-flow diagrams (Deloitte/AWS track).

Education

Modern College of Arts, Science and Commerce, Pune

Jul 2023 – Apr 2026

Bachelor of Business Administration in Computer Applications (BBACA)

Certifications

Data Analysis with Python — freeCodeCamp | MS Excel for Data Analytics — Simplilearn SkillUp | Generative AI Fundamentals — Microsoft | Cybersecurity Essentials
